EVERCOAT®
AQUA CRAFT™

Lightweight Vinyl Ester Marine Filler

Superior
Performance Above & Below the Waterline

Fast
Dry-to-Sand Time

Industry-Leading
Sanding & Clog-Free Formula

Industry-Leading
Filling & Faring

DESCRIPTION

Built for life on the water, Aqua Craft™ Marine Filler is formulated to resist the corrosive effects of saltwater and harsh marine environments while streamlining the application process. With a fast dry-to-sand time of 30 minutes, up to 15x faster than traditional marine fillers, it accelerates workflow and reduces downtime. Built to deliver a durable, reliable base for marine coatings, it provides lasting protection above and below the waterline.

FEATURES

Superior Performance Above and Below the Waterline

Advanced vinyl ester technology delivers the speed and sandability of polyester with the corrosion resistance of epoxy. Designed to perform in demanding marine environments, this filler passes more than 500 hours of submersion corrosion testing (ASTM D870) for confidence above and below the waterline.

Faster Repairs with Easier Sanding

Engineered for efficiency, this marine filler features a 30-minute dry-to-sand time, 15x faster than traditional epoxy fillers. This significantly reduces labor time while surpassing quality standards in durability and finish quality.

Clean Results with Broad Compatibility

The stain-free, blush-free formula ensures consistent, professional results. Fully compatible with gel coat and marine paint systems, making it ideal for repairs, fairing, and surface restoration.
